How to build undefined

<u>Using NPM</u>

1- Extract files
2- In the terminal cd into undefined
3- Run the command `npm install`
4- Run the command `npm start`

<u>Using Docker</u>

1- Extract the files
2- In the terminal run `docker build . -t undefined`
3- Once built run `docker run –p 80:8080 undefined
4- Open in the browser localhost:8080 or localhost:80
